

**PRINTER SYSTEM HAVING A ROTATABLE INPUT TRAY WITH
LENGTH ADJUSTER**

Abstract of the Disclosure

- 5 A printer system including a tray adapted for use with a printing mechanism. The tray includes a stationary portion, a rotatable portion, and a length adjuster. The stationary portion is adapted to be coupled with the print mechanism. The rotatable portion is rotatably coupled with and extends a first length from the stationary portion. The length adjuster is slidably coupled with
10 the rotatable portion and is adapted to move along an adjustable length. The adjustable length is greater than the first length of the rotatable portion.
